## Organize

The 3rd edition of the international conference on materials science and engineering and their impact on the environment

(ICMSE'2024)

29 And 30 Mai 2024

### Importance of the subject:

This conference will focus on the latest interdisciplinary research in the field of predicting new materials to provide solutions to energy challenges and climate change and environmental protection and is an unmissable event for senior and young researchers, students and industry professionals working in this field across the world.

### Topic

Nano materials and Nano composites  
Thin films and Surface science  
Semiconductor & Electronic materials and devices.  
Crystal growth and its application  
Advance materials & Energy materials.  
Polymers, polymer composites and their applications.  
Modelling, simulation & computation of material phenomenon.

**General Chair**
